

View of project participants on the contribution of the project activity to sustainable development

Environmental well-being

- Aleo SHP is a run-of-river hydel scheme, which involves no storage; the water is diverted into water conductor by construction of a weir. Thus there is no submergence of forest and cultivated lands due to construction of any components of the scheme.
- The project does not create any negative impact on the environment as there is no submergence or stagnation of water.
- The project will not have any negative impact on public health scenario.
- The project activity reduces GHG emissions which would have taken place in the absence of the project due to generation of the similar proportion of electricity generated by the project from fossil fuel based generating stations.

Social well-being

- The project does not involve any displacement of human inhabitation in the area as the land requirement is very small.
- The project proponents has confirmed to the village body of the following within two years of project implementation Complete refurbishment of the main road of village Street lighting of common places in the village Community shed in the village temple
- The project has lead to direct and indirect employment for the local population as the construction and maintenance staff has been drawn from the nearby local areas. -The project may promote ecotourism in due course.

Economic well-being

- The project proponent has invested approximately Rs 138.06 Million in the proposed project, which is a considerable additional investment in a rural area which would not have happened otherwise, in the absence of the project activity.
- Technological well-being-The project makes use of efficient environmentally safe technology for power generation. -The generation of electricity from the project leads to strengthening of the grid, increasing the energy availability and quality of power in the nearby rural areas thereby meeting the energy demand to a certain extent leading to technological well-being.
